### Message from the Guest Editors

Dear Colleagues,

Health systems are facing disrupting situations (limited resources, aging population, chronicity, pandemic scenarios, etc.) that threaten traditional functioning and procedures, requiring novel models of healthcare delivery to provide a timely response to the increasing demands of citizens.

This Special Issue aims at collecting advances, proposals, and solutions based on sensors, systems, and e-Health platforms for the management and supervised monitoring of any kind of patient in any biomedical situation. We invite authors to submit their research results and share their experiences based on technology proposals, system implementations, and use cases, as well as review articles.

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
