submissions:

closed (30 October 2021)

Message from the Guest Editors

Dear Colleagues,

In geophysics, electrical and electromagnetic methods have demonstrated their potential for environmental engineering investigations. Both galvanically coupled and contactless measuring devices are used for a wide range of environmental applications, such as geohydrological characterization, precision agriculture, brownfield investigations, monitoring of mass movements and land degradation, as well as climate-change-driven processes under extreme conditions. Moreover, innovative technologies such as wireless instruments, permanent monitoring setups, and light airborne survey systems present new perspectives for the use of electromagnetic and electrical methods in the context of environmental engineering applications. This Special Issue aims at providing an overview of recent advances in measuring technologies, with a special focus on case studies demonstrating the potential of electrical and electromagnetic methods applied to environmental problems.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
