Sensing with Femtosecond Laser Filamentation

Guest Editors:

Prof. Dr. Weiwei Liu

Institute of Modern Optics, Nankai University, Tianjin 300071, China

Prof. Dr. Huailiang Xu

College of Electronic Science and Engineering, Jilin University, 2699 Qianjin Street, Changchun 130015. China

Prof. Dr. Liu Yi

Department of Optical-electrical Information Engineering, University of Shanghai for Science and Technology, Shanghai 200093, China

Deadline for manuscript submissions:

closed (15 September 2023)

Message from the Guest Editors

Femtosecond filamentation is a unique nonlinear optical phenomenon observed extensively in liquids, solids, and gases, in which ultrashort laser pulses propagate over long distances with high intensity. Its applications in remote sensing, laser communication, laser fabrication, advanced laser technology, etc., have aroused broad research interests. During filamentation, several physical processes are involved. The scales of the space and time are also widely spanned in the study of filamentation, and the electromagnetic wave frequency covers broad range from ultraviolet to microwave. Currently, the study of the filamentation remains very challenging, being a new interdisciplinary frontier involving physics, chemistry, material science, biomedical science, environment, artificial intelligent, electronics, and so on.

It is expected that this coming Special Issue will benefit the community by reporting new advances in this forefront field crossing broad topics and help newcomers easily gain familiarity with the community.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
