Human Activity Recognition Using Wearable Sensors for Learning and Teaching

Guest Editors:

Prof. Dr. Jochen Kuhn

Dr. Stefan Küchemann

Prof. Dr. Paul Lukowicz

Prof. Dr. Albrecht Schmidt

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

Human activity recognition (HAR) is a well-established, dynamic research area within ubiquitous and wearable computing. As sensors are becoming increasingly ubiquitous and the machine learning methods needed to evaluate the collected information are improving, we are seeing a rapid emergence of practical, mature applications in fields such as, for example, Industry 4.0, sports, and healthcare. While the use of sensors has also been extensively studied in education, the use of complex activity recognition (rather than the mere sensing and simple evaluation of sensor signals) is still at a very early stage.

Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
