closed (31 December 2022)

Message from the Guest Editors

Dear Colleagues,

Wearable systems have attracted attention in many fields, such as healthcare, sport, and security. Their development requires tight collaborations of different sectors (material science, fashion and functional garment design, electronics, advanced manufacturing, data analysis and medicine, etc.) and involvement of efficient computational tools in order to increase the intelligence capacity of these devices. In this context, we are organizing a Special Issue in *Sensors* to offer a systematic overview of this emerging research field and provide innovative interdisciplinary approaches. This issue will provide a leading forum for disseminating the latest results of research, development, and applications of wearable systems with a strong involvement of artificial intelligence.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
