Message from the Guest Editor

Dear Colleagues,

Because magnetic sensors can measure physical information through wireless technology, they are applicable for various uses. In this Special Issue on "Magnetic Sensing Systems", the basic research study of magnetic sensors and related applications will be reported, such as power electronics including motors, the magnetic storage system, bio-medical applications, Internet of Things or non-destructive tests or energy harvest.

Keywords:

- magnetic sensors
- biosensing system
- energy harvest
- health care
- Internet of Things
- non-destructive test

Prof. Dr. Shin Yabukami

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
