### Message from the Guest Editors

Dear Colleagues,

Radar technology has been known for more than 100 years and it has been under permanent development for both civilian and military applications. The development of microwave technology has been encouraged by radar technology and they have both evolved together. In recent years, development trends of radar technologies can be seen, in particular, in the field of system architecture, algorithms, waveforms, signal processing, materials and new device design, new applications and practical solutions. Therefore, it is our pleasure to invite you all to contribute to this Special Issue of *Sensors*.
