Microfluidics for Biodiagnostics

Guest Editors:

Dr. Hugo Aguas

Department of Materials Science,
Faculty of Science and
Technology, New University of
Lisbon and CEMOP/UNINOVA,
2829-516 Caparica, Portugal

Dr. Rui Igreja

CENIMAT/I3N, Departamento de
Ciência de Materiais, Faculdade
de Ciências e Tecnologia,
Universidade NOVA de Lisboa
and CEMOP/UNINOVA, Campus
da Caparica, 2829-516 Caparica,
Portugal

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

Dear Colleagues,

The field of biodiagnostics is a multidisciplinary area of research involving biology, chemistry, physics, and materials. Research can adopt varied setups and configurations, depending on the target analyte, the bioreceptor to be used, the interface sample/transducer concerned, the transduction principle applied, and the test format used for the specific application (clinic diagnostic, bioprocess monitoring, biosafety, environmental surveillance, etc.). The medical field is one of the most attractive application areas for biodiagnostics, as research in this area could provide reusable devices for the rapid and accurate analysis of physiological parameters and the demand for cost-efficient platforms is the key to success and acceptance in a competitive market. On the other hand, microfluidics provides the possibility of performing sophisticated analysis within chips that have been able to be held in the hand, allowing fast sample analysis, high throughput, portability, and reduced reagent use, all of which are associated with a decreased cost per analysis.

Special Issue

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
