### Message from the Guest Editors

This Special Issue is dedicated to microwave sensors and their applications, especially the most recent and innovative. It will welcome papers that propose applications in areas little explored in the microwave world, as well as applications in more consolidated areas, but with innovative ideas in the technology used and materials chosen.

The topics of interest include, but are not limited to, microwave sensor design, new applications of microwave sensing, metamaterial technology's application to microwave sensors, sensing for material characterization, remote sensing, short-range radar, biomedical application, imaging, agriculture and food processing applications, IoT applications, safety and security, innovative applications, and miniaturized sensor design.
