### Message from the Guest Editors

Dear Colleagues,

Advances in pervasive sensing and computing are transforming the landscape of opportunities for mental health researchers and practitioners to provide scaleable, reliable assessment, monitoring, and treatment to individuals across a diverse spectrum of neuropsychiatric conditions and severity levels, from severe mental illness to optimizing wellness and productivity. To explore these issues in a cross-disciplinary forum of technologists, psychiatrists and psychologists, the 7th International Symposium on Pervasive Computing Paradigms for Mental Health ([mindcaresymposium.org](http://mindcaresymposium.org)) was held at MIT's Sanberg Center in Cambridge, Massachusetts, in January 2018.
