Person Re-Identification Based on Computer Vision

Guest Editors:

Prof. Dr. Jie Qin

Prof. Dr. Mang Ye

Dr. Yichao Yan

Dr. Jiaxin Chen

Deadline for manuscript
submissions:

closed (20 February 2024)

Message from the Guest Editors

Person re-identification (re-id) is an important research topic in computer vision and has received tremendous research efforts in the past decade. Existing works have addressed the re-id problem from various perspectives. However, more efforts are still needed to make the re-id approaches more reliable, robust, efficient, and generalizable. Therefore, this Special Issue aims to solicit original research from both the industry and academia on recent advances, solutions, applications and new challenges in the field of person re-identification based on computer vision techniques. The topics of interest include (but are not limited to) the following areas:

- Challenges in person re-id and related tasks;
- Robust person re-id systems;
- Domain adaptation/generalization for person re-id;
- Cross-modal or multi-modal person re-id;
- Joint person detection and re-id;
- Partial/occluded person re-id;
- Video-based person re-id;
- Lightweight or efficient models for person re-id;
- Multi-sensor feature fusion for person re-id;
- Novel benchmarks for person re-id;
- Surveys/reviews for person re-id and related tasks

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
