Message from the Guest Editors

Dear Colleagues,

Sensors have become ubiquitous in daily human life. Furthermore, piezoelectric materials are critical to the operation of many types of these sensors. For almost a century, bulk piezoelectric materials, such as thick films of quartz, lead zirconate titanate (PZT) etc., have been widely used in actuators. Beyond these state-of-the-art materials, with the advancement and widespread use of micro- and nano-scale manufacturing, assembly, and packaging technologies, the synthesis and incorporation of piezoelectric nanomaterials has become key. A variety of piezoelectric nanomaterials, including ZnO nanowires, PZT nanofibers, barium titanate nanoparticles, etc., have been explored to develop the next generation of applications, such as soft robotics and the Internet of Things.

This Special Issue on piezoelectric nano structures for sensor applications intends to highlight recent advancements in the nanomaterial synthesis of different piezoelectric materials, including inorganic, organic, and hybrid inorganic/organic nanocomposites for sensing applications.

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
