Security and Privacy in Wireless Sensor Network

Guest Editors:

Prof. Dr. Athanasios V. Vasilakos

Center for AI Research, University of Agder, Grimstad, Norway

Dr. Gagangeet Singh Auja

Durham University, Durham, UK

Dr. Sahil Garg

École de technologie supérieure, Université du Québec, Montreal, Canada

Deadline for manuscript submissions:

closed (31 August 2020)

Message from the Guest Editors

Wireless Sensor Networks (WSN) has engulfed the entire application domain in smart communities due to their potential benefits. A secure and dependable WSN architecture must ensure confidentiality, authentic and availability as a priority. This necessitates the provision of trust, security and privacy of sensors while ensuring a smart and connected ecosystem. For this reason, there is strong requirement of lightweight and adaptive security solutions and countermeasures against attacks and threats in WSN. The wide gap between the existing security solutions and the actual practical deployment in smart cities and remote environments is one of the major reasons why we require novel strategies, mechanisms, architectures and frameworks. Even more, it is also important to access and understand the different level of vulnerabilities and attack vectors in WSN. For these reasons, the special issue provides a platform for the academicians, researchers and industry technocrats to present their security solutions and proof of concepts in WSN. The goal of the special issues is to encourage the contributions of high quality to address the security and privacy challenges in WSN.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
