Message from the Guest Editors

Healthy ageing should be an aim in modern society. Following the increase in life expectancy due to improvements in medicine and technology, the prevalence of age-related disorders is increasing. Further, such conditions are appearing earlier in life, even in adolescence, introducing disturbances into gait, posture, and general daily activities. These disorders can appear in individuals with a previously diagnosed musculoskeletal lesion as well as in able-bodied persons. Thus, there is a disparity between increases in life expectancy and wellbeing.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
