Gas Sensors for Internet of Things Era

Guest Editors:

Dr. Sangtae Kim

Department of Nuclear
Engineering, Hanyang University,
Seoul, Korea

Dr. Young Seok Shim

Department of Materials Science
and Engineering, Silla University,
Busan, Korea

Deadline for manuscript
submissions:

closed (26 August 2021)

Message from the Guest Editors

Dear Colleagues,

Low-power gas sensors represent a key component of the Internet of Things (IoT) era, effectively collecting information on specific gaseous species and transforming it into an electrical signal. In particular, gas sensors that detect minute concentration of hazardous gases have immediate technological application in food processing, medical diagnosis, aerospace vehicles, and environmental monitoring. Traditionally, various gas sensor types, including electrochemical, semiconductor, optical, capacitance-based, calorimetric, and acoustic-based gas sensors, have been validated and commercialized. With the advent of the IoT era, however, the requirements for successful gas sensors have diversified, involving novel key performance criteria such as miniaturized size, low power consumption, and easy integration with electronic circuits. In addition, individual sensor devices as well as gas sensor systems including heaters, circuit elements such as low-power wireless transmitters, and IoT platform integration have received significant research attention. sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
