Vibration Sensor-Based Diagnosis Technologies and Systems: Part I

Guest Editor:

Prof. Dr. Len Gelman

School of Computing and Engineering, Department of Engineering and Technology, University of Huddersfield, Huddersfield HD1 3DH, UK

Deadline for manuscript submissions:

closed (31 December 2021)

Message from the Guest Editor

This SI focuses on vibration sensor-based diagnosis technologies and systems for machineries/structures with the main attention to novel developments, related to: vibration sensors and intelligent vibration sensors, signal processing of sensor data, artificial intelligence for diagnosis decision making, and adaptation of vibration sensor-based diagnosis technologies to non-stationary conditions, related to machineries and structures.

- Classical, time-frequency, and higher-order signal processing for vibration sensor-based diagnosis technologies and systems;
- Artificial intelligence for vibration sensor-based diagnosis technologies and systems;
- Vibration sensor-based health diagnosis technologies and systems for engineering structures;
- Vibration sensor-based condition monitoring technologies and systems for machinery and complex electromechanical assets;
- Adaptive vibration sensor-based diagnosis technologies and systems;
- Vibration sensor-based diagnosis technologies and systems for linear and non-linear asset components/assets;
- Diagnostic feature extraction for vibration sensor-based diagnosis technologies and systems.

Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
