Deadline for manuscript
submissions:

closed (30 September 2020)

Message from the Guest Editors

Dear Colleagues,

This Special Issue accepts submissions of high-quality research papers and review articles in the topic of wearable sensor applications for rehabilitation. Submissions must be original contributions that have not been published before and are not currently under review by other journals.

Potential topics of interest include but are not limited to:

- Wearable sensors systems for outcome measurement;
- Machine learning approaches to extract knowledge from wearable sensor systems;
- Embedded sensor systems in wearable assistive devices (i.e., prostheses, orthoses, etc.);
- Wearable sensor systems to characterize mental state;
- Sensor approaches to enhance current clinical outcome measures;
- Smartphone applications related to rehabilitation that employ sensor or imaging approaches.

Prof. Edward Lemaire

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
