closed (20 April 2022)

Message from the Guest Editors

Dear Colleagues,

The introduction of sensors and wearables in medicine have been beneficial. Sensors are able to collect data which can be analyzed. They can provide care personnel with invaluable insights into symptoms or the trends in wellbeing in healthcare. Using recommendations and remote care, healthcare provisioning can be optimized in order to increase efficiency in terms of costs and personnel allocation. **This Special Issue will address all novel sensor systems consisting of wearable sensors, signal processing techniques, and decision support systems for healthcare applications.**

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
