

Special Issue

Image Processing and Computer Vision Sensing Technologies in Engineering Applications and Digital Twins

Message from the Guest Editors

This Special Issue aims to explore recent advances in Optronics Sensing Technologies focusing though in relevant to Digital Twins domains such as 3D reconstruction models and multi-object detection and localization. Specifically, novel contributions that will explore their validity and applicability for a Digital Twin for visual data, independently of the application (e.g., maintenance, construction, surveillance) as well as review articles that can facilitate the community towards a more effective research building are requested to contribute to the objectives of this Special Issue.

Guest Editors

Dr. Stefanos Vrochidis
Dr. Konstantinos Ioannidis
Dr. Nikolaos I. Dourvas

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
