

Special Issue

Signal Processing and Sensing for Multimedia Communication System

Message from the Guest Editor

The development of the advanced signal processing and sensing schemes is related to the growth of the multimedia communication system. Cellular mobile, satellite, and underwater multimedia communication systems, as well as healthcare and telemedicine systems, are integrated toward seamless applications. The state-of-the-art research methods employed on these emerging technologies are of particular interest. This Special Issue is addressed to all types of signal processing and sensing schemes for multimedia communication systems.

Guest Editor

Dr. Chin-Feng Lin

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
