Electrochemical Sensors for Analytical Applications

Message from the Guest Editors

The COVID-19 pandemic has made clear how our society requires quickly available analytical tools to detect, screen and address emerging healthcare and environmental issues. In the same context, emerging electrochemical sensing and analytical technologies must meet the demands of wastewater treatment plants, the food and pharmaceutical industry, clinical assays and environmental control agencies. These strategies should provide simple, fast, inexpensive and reliable methodologies for on-site screening, monitoring and analysis that can act as alternative or complementary approaches to more traditional analytical techniques. With these facts in mind, this Special Issue aims to cover the advances in electrochemical sensors for the reliable, fast, and affordable analytical detection of analytes in different fields of applications. Both research papers and review articles will be considered. We look forward to and welcome your participation in this Special Issue. Link: https://www.mdpi.com/journal/sensors/special_issues/ESAA

Guest Editors

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
