Non-orthogonal Multiple Access Techniques in Emerging Optical Wireless Sensor Networks

Message from the Guest Editors

This Special Issue aims to provide a forum to bring together latest research innovations from both practitioners and leading researchers from diversified interests to unlock the potential and address breakthrough novelties of NOMA systems. We invite prospective authors to contribute articles of high quality scientific research based on theory and experiments for NOMA. The key focus of this feature topic is to bridge the gap between theory, practice in design and applications while tailoring NOMA to integrate in the promising optical wireless technologies.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
