Digital Health and Smart Sensors for Better Management of Cancer and Chronic Diseases

Message from the Guest Editors

The last decade was prominently marked by the proliferation of “smart wearables”. This new decade is likely to see a broad adoption and application of wearable technologies in healthcare. Wearable devices are already used for the continuous monitoring of patients, better management of chronic diseases, prevention of emergency situations, improvement of care quality, and also reduction of health care costs.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
