

## Research on Adsorption and Purification Technology of Water and Air Pollution

Guest Editors:

**Prof. Dr. Xiyan Xu**

**Prof. Dr. Tao Duan**

**Prof. Dr. Dongxiang Zhang**

**Prof. Dr. Anwei Chen**

Deadline for manuscript  
submissions:

**closed (31 May 2023)**

### Message from the Guest Editors

Dear Colleagues,

With the development of the economy and the continuous growth of the population, energy consumption and the production of consumer goods are increasing, followed by worsening air and water pollution. In the foreseeable future, nuclear energy will still be a low-carbon alternative to traditional mineral energy, but there will still be waste water and waste gas generated in the nuclear energy production process. In order to solve industrial pollution problems including nuclear energy, oil, medicine, etc., and eliminate their negative impact on urban and rural water bodies and atmospheric environment, scholars around the world have developed a large number of efficient water treatment and air pollution control technologies and systems based on adsorption or advanced oxidation processes.

This Special Issue aims to collect the latest technologies of adsorption and purification techniques related to water pollution and air pollution treatment and control. We look forward to receiving your contributions from all over the world.

## Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
