Deadline for manuscript
submissions:

closed (30 May 2018)

Message from the Guest Editor

Dear Colleagues,

Capillary liquid chromatographic techniques continue to attract attention in the analytical chemistry society. The fast development of ultrahigh pressure capillary liquid chromatography has aided in increasing the popularity of the methodology. The very high separation power for highly complex samples has resulted in new applications in all fields of science.

The aim of this special issue is to present the state of art in capillary liquid chromatography techniques. Novel methodologies and stationary phases will be introduced for a vast number of various types of matrixes and samples. Focus will be on the use of capillary liquid chromatography in lipidomics and metabolomics, but as well in other fields of science.

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
