Deadline for manuscript
submissions:

closed (31 August 2023)

Message from the Guest Editors

Natural products are plants, endophytes, marine organisms that are rich sources of novel therapeutics and are used by old folk of several ethnicities as traditional medicines to alleviate and treat various diseases. Natural products contain unique chemical structures which can be isolated through conventional and advanced chromatographic methods. The structural elucidation of isolated compounds using various spectroscopic techniques should be employed to determine the correct structure which can be further subjected to bioassays.

The bioactive compounds obtained from isolation are usually in small amounts. Hence, compounds could be produced on a large scale via synthetic methods.

Therefore, it is our pleasure to invite researchers from related fields to share your findings and reviews in this Special Issue on “**Isolation, Elucidation and Synthesis of Bioactive Natural Products**”.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
