Message from the Collection Editors

Plant omics is a recent scientific field consisting of various disciplines, such as plant genomics, transcriptomics, proteomics, metabolomics, etc. The different omics tools and strategies provide greater opportunities to dissect molecular mechanisms and discover key genes, proteins, and metabolites in different plant organisms. Knowledge gathered through a multi-omics approach can help in understanding the response of plants to abiotic and biotic stress, and in the regulation of the relationship between plant metabolism and physiology.

In this Topical Advisory Panel Collection Series, “State of the Art in Plant Omics Analysis”, we welcome original research and review articles on the development and application of analytical methods in the field of plant genomics, transcriptomics, proteomics, metabolomics, and other plant omics.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
