Mineral/Coal Flotation and Adsorption Mechanism

Guest Editors:

Prof. Dr. Dianwen Liu

Prof. Dr. Jiushuai Deng

Prof. Dr. Qicheng Feng

Deadline for manuscript submissions:

closed (30 September 2023)

Message from the Guest Editors

Flotation is a practical technique to extract minerals based on differences in the physical and chemical properties on the mineral surfaces. Flotation equipment, flotation techniques, and flotation reagents are used for the recovery and separation of valuable minerals from gangue minerals. The gradual depletion of high-grade mineral resources leads to an increase in the exploitation and utilization of refractory ores. The enhanced recovery of targeted minerals has become a problem that urgently needs to be solved. Thus, there is a crucial need for research on flotation theory and its application to address the issues in the recovery of valuable minerals. This Special Issue will focus on recent advances in mineral/coal flotation theory and techniques. Research or review articles concerning the synthesis and application of flotation reagents and adsorption mechanism, the migration rule of flotation reagents, the design of flotation equipment, enhanced flotation separation methods, refractory ore treatment [...] for further reading, please follow the link to the Special Website at:https://www.mdpi.com/journal/separations

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, Separations, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
