Deadline for manuscript submissions:

closed (15 March 2022)

Message from the Guest Editor

Molecularly imprinted polymers (MIPs) have become popular in analytical laboratories thanks to their inherent selectivity allowing the extraction of target analytes free of co-extractives. MIPs have largely been used as sorbents in conventional solid-phase extraction, but recent years have seen MIPs' incorporation to other sample preparation techniques, such as solid-phase microextraction, stir bar sorptive extraction or liquid-phase microextraction, among others.

I would like to invite colleagues to contribute with original research articles and reviews to the present Special Issue on the latest trends on the synthesis and further use of MIPs as selective extraction materials in sample preparation.

This Special Issue is supported by the Sample Preparation Task Force and Network, of the European Chemical Society-Division of Analytical Chemistry (<https://www.sampleprep.tuc.gr/en/home/>).

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
