Nanomaterials in Green Analytical Chemistry

Guest Editors:

Prof. Dr. George Zachariadis

Department of Chemistry,
Aristotle University, 54124
Thessaloniki, Greece

Dr. Rosa Peñalver

Department of Analytical
Chemistry, Faculty of Chemistry,
Regional Campus of
International Excellence
“Campus Mare Nostrum”,
University of Murcia, E-30100
Murcia, Spain

Dr. Natalia Manousi

Department of Chemistry,
Aristotle University of
Thessaloniki, 54124 Thessaloniki,
Greece

Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editors

Sample preparation and pretreatment procedures increasingly demand the use of powerful and, if possible, universal materials for extraction, microextraction, purification, fractionation, and other separations procedures. In biological, food, environmental, and many other types of samples, the sample preparation step, besides being crucial for the overall performance of the analysis, remains critical, also because of the production of several wastes. Therefore, the employment of environmentally friendly and low-quantity materials has become popular in numerous analytical methods aiming to target analytes, including metals, biomolecules, metabolites, and organic pollutants. Nanomaterials can further assist the development of green analytical chemistry in this sense.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry,
Dartmouth College, Hanover, NH
03755, USA

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
