Deadline for manuscript submissions:

**closed (30 June 2018)**

### Message from the Guest Editors

Dear Colleagues,

During last few decades, massive industrial and agricultural development has been accompanied by the release of a great variety of contaminants to the environment. Such compounds, depending on their physicochemical properties, might be incorporated into the food chain, which represents an important public concern. Accordingly, authorities have established restrictions to protect our environment from potential harmful substances. It has made the development of analytical methodologies, mainly based on chromatographic techniques, able to detect and determine a wide variety of compounds at very low concentration levels, in both food and environmental samples, in a reliable and accurate manner, necessary.

We would like to invite colleagues to contribute with original research articles and reviews to the present Special Issue on the latest trends in chromatographic techniques for the analysis of contaminants in environmental and food samples, including recent advances in sample preparation.

Dr. Antonio Martin-Esteban

Dr. Esther Turiel

## Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
