### Message from the Guest Editors

This Special Issue intends to explore the latest advances in antioxidant extraction from natural sources and their characterization regarding bioactive compounds with health benefits. Manuscripts dedicated to plant extraction are also welcome. A special emphasis will be given to eco-friendly technologies with a deep insight into polyphenol characterization using analytical methodologies (such as HPLC-DAD, HPLC-MS, and NMR), in vitro assays, and in vivo studies to evaluate bioactivity and safety, addressing potential final applications. Ms. Diana Andreia Tavares Pinto from the Instituto Superior de Engenharia do Porto, Polytechnic of Porto will also assist in editing this Special Issue.

Deadline for manuscript submissions:

**closed (31 December 2023)**

## Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
