

Porous Materials for Separation of Gas and Chemicals

Guest Editor:

Prof. Dr. Xin Zhang

Department of Chemical
Engineering, Beijing University of
Technology, Beijing, China

Deadline for manuscript
submissions:

closed (20 January 2024)

Message from the Guest Editor

This Special Issue aims at the emerging trends of separation applications, including but not limited to hydrocarbon separation, VOC capture, greenhouse gas capture, drug separation, water purification, isotope separation and so on. Experimental, theoretical and data-driven approaches such as machine learning research articles and review papers are all welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
