

## Signal Processing, Grammatical Evolution and Artificial Intelligence of Signals

Guest Editor:

**Prof. Ioannis Tsoulos**

Department of Informatics and  
Telecommunications, University  
of Ioannina, 45110 Ioannina,  
Greece

Deadline for manuscript  
submissions:

**closed (31 October 2022)**

### Message from the Guest Editor

It is my pleasure to invite you to submit your valuable work to this Special Issue on “Signal Processing, Grammatical Evolution and Artificial Intelligence of Signals” of the reputable MDPI journal *Signals*.

The aim of this Special Issue is to present recent advances and extensions in grammatical evolution, application of the method in scientific and practical areas, and software specialized to grammatical evolution, as well as artificial intelligence methods applied to signal processing.

This Special Issue aims to highlight advances in signal processing, grammatical evolution and artificial intelligence in relation to signals. Topics include but are not limited to:

- Application of grammatical evolution in signal processing;
- Evolution of neural networks using grammatical evolution;
- Feature construction using grammatical evolution;
- Parallel techniques for grammatical evolution;
- Robotics and grammatical evolution;
- Self-organizing maps and grammatical evolution;
- Software specialized to grammatical evolution and its applications;
- Language inference with grammatical evolution;
- Usage of artificial intelligence techniques on signal processing.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Santiago Marco

1. Department of Electronics and Biomedical Engineering, University of Barcelona, Martí I Franqués 1, 08028 Barcelona, Spain  
2. Signal and Information Processing in Sensor Systems, Institute for Bioengineering of Catalonia, The Barcelona Institute of Science and Technology, Baldiri Rexac 10-12, 08028 Barcelona, Spain

## Message from the Editor-in-Chief

Our primary goal is to encourage scientists and engineers to publish their theoretical results and developed methods in as much detail as possible. There is no limit to the maximum length of papers. Whenever possible, authors are encouraged to provide relevant data and developed code so that the results can be reproduced. Our goal is to provide a platform for scientists and engineers to share new approaches to signal processing in various application domains.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec](#), and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2024).
