Deadline for manuscript  
submissions:

**closed (30 December 2019)**

### Message from the Guest Editors

Dear Colleagues,

Economic growth in most of countries has led to more than a doubling in road travels with an even greater increase in costs of congestion and road accident-related social costs, especially in urban areas. In this context, an essential and challenging task for transportation researchers and planners is ensuring the safety of road networks.

As road safety represents an important area of interest for smart city ecosystems, researchers, professionals, and governments look to Intelligent Transportation Systems (ITS) and Internet of Things (IoT) as solutions to transport problems. The employment of ITS technologies and IoT solutions allows for the collection, sharing, and analysis of information about vehicles, road infrastructures, and drivers to prevent accidents and make the driving experience safe and enjoyable for road users.

We encourage high-quality, original submissions and innovative research providing significant contributions to the theory and practice of road safety and data-driven decision making.

Prof. Giuseppe Piero Guido

Dr. Alessandro Vitale

Salerno, 84084 Salerno, Italy

## Message from the Editor-in-Chief

*Smart Cities* provides an advanced forum for the dissemination of information on the science and technology of smart cities. It publishes reviews, regular research papers (articles) and communications in all areas of research concerning smart cities. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers so that the full experimental results can be reproduced. Manuscripts regarding research proposals and research ideas are particularly welcome.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Urban Studies)
