Deadline for manuscript
submissions:

closed (15 February 2022)

Message from the Guest Editors

Dear Colleagues,

The IoT has pervaded our daily life by making things interconnected through the Internet, as well as smarter, distributed, and more autonomous. The development of intelligent applications in IoT has gained significant attention in recent years. The Cloud provides many benefits to IoT; however, it faces some accessibility challenges. The unstable connection between the Cloud and mobile devices is expected to prevent providers from achieving optimal performance. Motivated to solve these problems, Edge Computing (EC) has appeared to decrease latency and support the massive machine type of communications. EC, however, faces various challenges and open issues, and we need more efforts to deliver the envisioned autonomous intelligent edge and intelligent mesh. The future intelligent mesh will involve numerous autonomous entities capable of understanding their internal status, the status of the environment and their peers, and of taking action to efficiently serve the desired applications. This SI aims at revealing novel solutions towards a new intelligent edge mesh in SCs, bringing together scientists to discuss future research directions in the domain.

Innovation Systems, University of
Salerno, 84084 Salerno, Italy

Message from the Editor-in-Chief

Smart Cities provides an advanced forum for the dissemination of information on the science and technology of smart cities. It publishes reviews, regular research papers (articles) and communications in all areas of research concerning smart cities. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers so that the full experimental results can be reproduced. Manuscripts regarding research proposals and research ideas are particularly welcome.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Urban Studies)
