Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a call for academic papers on the topic of "Societal Responses to Climate Change: Shaping Public Discourse and Policy." As the global climate crisis unfolds, understanding how societies respond, engage, and mobilize to address climate change is crucial. The various social sciences disciplines play a significant role in exploring the complex interactions between individuals, communities, and private and public institutions.

Research areas may include (but are not limited to) the following:

- Societal responses to climate change across different levels: public and private sectors as well as local, regional, and global movements;
- Academic discourse of sociology and climate change: theoretical frameworks, conceptual models, and approaches;
- Public discourse on climate change: analyses, formulations, and implementation of policy initiatives;
- Community and indigenous movements as a response to climate change: public attitudes, behaviours, values, and motivations.

We look forward to receiving your contributions!

Dr. Edson Kieu

Author Benefits

Open Access : free for readers, theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.

High Visibility: indexed within the open journal or in Special Issues devoted to specific topics of interest to the field.

Journal Rank: CiteScore - Q2 (*General Social Sciences*)

Message from the Editor-in-Chief

Societies (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.
