Message from the Guest Editors

For our Special Issue, we are seeking contributions discussing whether LLM chatbots such as ChatGPT should be considered a Panacae or a Pandora's Box.

With their rapid integration and application across various sectors and in everyday life, LLM chatbots have triggered both optimistic and pessimistic responses. This Special Issue seeks to collect a selection of papers that critically explore the promise and peril of LLM chatbots from a variety of different fields, approaches and perspectives (e.g., governance, political economy, technology and usage). We welcome research articles, conceptual papers and reviews positioned within a specific field, such as education, science, journalism, medicine, technology, etc.

SpecialIssue

Message from the Editor-in-Chief

Societies (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), RePEc, EconBiz, and other databases.
Journal Rank: JCR - Q2 (*Sociology*) / CiteScore - Q2 (*General Social Sciences*)
