### Message from the Guest Editors

Dear Colleagues,

There is a paucity of evidence-based programs that have been designed and/or evaluated with children and families who are involved with the child welfare system or are at risk of such involvement. This Special Issue seeks to showcase innovative and contextually sensitive prevention and intervention efforts for this population that include, but are not limited to, the domains prioritized by the Family First Prevention Services Act (FFPSA): mental health, substance abuse prevention and treatment services, in-home parenting skill-based training programs, or kinship navigator services.

We welcome qualitative and quantitative studies at all stages of development.

## Message from the Editor-in-Chief

*Societies* (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.
