Dalla Lana School of Public Health, Social and Behavioural Sciences Division, University of Toronto, Toronto, ON, Canada

An increasingly competitive globalized capitalism has coupled with both accelerating technological change and a series of progressively “hardening” socio-political-economic factors to produce growing inequality in contemporary labor markets.

Deadline for manuscript submissions:

**closed (31 October 2021)**

At the individual level, we know that precarious work, poor working conditions, and the psychic burden of low social position at work are associated with adverse health outcomes. More broadly, the population health consequences of labor market and wealth inequality are associated with not just an increased burden of disease, but also, critically, a gradual decline in social cohesion, civic behaviors, and the broad societal commitment to mores that support democratic institutions. The focus of this Special Issue is on exploring the full range of implications and consequences of rising labor market inequality for public health, and to provide strategic recommendations for mitigating structural disadvantage through healthy public policy.

## Message from the Editor-in-Chief

*Societies* (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [RePEc](#), [EconBiz](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Sociology*) / CiteScore - Q2 (*General Social Sciences*)
