

Special Issue

Climate Change: Challenges, Opportunities, and Perspectives

Message from the Guest Editor

The society–nature relationship and its effects on climate change represent a complex and changing phenomenon with important economic, political, and social ramifications. This Special Issue seeks to explore the challenges and opportunities presented by climate change, with a broad focus on problems and potential resolutions to the crisis. Environmental studies scholars have made a great deal of progress advancing our knowledge of the human causes of climate change as its effects continue to emerge in various locations around the globe. Climate change represents the most immediate threat disrupting the nature–society balance. This Special Issue of *Societies* focuses on the extent of disruptions in the nature–society balance, their effects, and how societies and competing interests in societies are responding to these historical conditions. We encourage the submission of research that examines the impact of a wide range of climate change issues, including economic development, corporations, inequality, governance, political economy, and civil society.

About the Journal

Message from the Editor-in-Chief

Societies (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.
