Message from the Guest Editors

Community-engaged research (CER) advances environmental justice by centering the local knowledge and concerns of frontline communities in the research agenda, creating equitable and mutually beneficial relationships between these communities and professional researchers, and co-producing actionable data that can influence policies and practices. This Special Issue welcomes empirical and conceptual articles on environmental justice that employ any CER approach, including participatory action research, community-based participatory research, citizen science and community science, and Indigenous-led and decolonial research. This research may involve collaborations with community organizations and advocates by academic and other professional researchers, and/or government agencies.
