

## Special Issue

# Young Talents in Solid-State Sciences

### Message from the Guest Editors

We are pleased to invite you to contribute to this Special Issue “Young Talents in Solid-State Sciences”, which aims to give you the opportunity to highlight your innovative contributions to the field and to provide a platform for cutting-edge research. We invite you to submit original research articles, reviews, and perspectives covering all aspects of solid-state sciences, including, but not limited to:

- Synthesis and characterization of novel solid-state materials;
- Advanced characterization techniques applied to solid-state materials;
- Theoretical and computational studies on solid-state materials;
- Properties of solid-state materials;
- Applications of such materials, e.g., in electronics, photonics, energy storage, and conversion.

This Special Issue offers you, as a young scientist, a unique opportunity to present your work to a wide audience, to become known in the scientific community, and to contribute to the progress of solid-state science. We would like to address young talents who completed their PhD no more than 8 years ago and are under 40 years old. Of course, we will take into account career breaks due to family circumstances, for example.

---

### Guest Editors

Prof. Dr. Guido Kickelbick

Prof. Dr. Mirosław Mączka

Prof. Dr. Enrico Bernardo

Dr. Manickam Minakshi

Prof. Dr. Adrián Durán Benito

---

### Deadline for manuscript submissions

31 December 2026

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, CAPIus / SciFinder, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.3 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2025).
