Fostering Sport for a Healthy Life

Guest Editors:

Dr. Giancarlo Condello

Department of Medicine and Surgery, University of Parma, 43126 Parma, Italy

Dr. Valentina Presta

Department of Medicine and Surgery, University of Parma, 43126 Parma, Italy

Dr. Santos Villafaina

Physical Activity and Quality of Life Research Group (AFYCAV), Faculty of Sport Sciences, The University of Extremadura, 10003 Cáceres, Spain

Deadline for manuscript submissions:

25 March 2025

Message from the Guest Editors

Participation in sport is the central construct for the achievement of any individual's health. Sport enters any life stage, ranging from youth development, for the support of physical and cognitive growth, to healthy aging, for the reduction in the decline in body functioning. Therefore, it is essential to investigate all the possible factors that influence the performance of a variety of sport disciplines. Similarly, it is still necessary to explain several mechanisms that explain human responses to sport performance. Moreover, the new challenges that society is currently facing at global level and the new opportunities offered by numerous technologies and artificial intelligence enlarge the field of research and the creation of implications for athletes and general population. Several research questions still remain unanswered and new concepts must be defined.

Articles in the form of reviews with meta-analysis and original research centered on prospective longitudinal studies and randomized controlled trials are invited for this Special Issue, especially those combining a high academic standard coupled with practical implications for practitioners and policy-makers.

Message from the Editor-in-Chief

Sports (ISSN 2075-4663) is a peer-reviewed scientific journal that publishes original articles, critical reviews, research notes and short communications in the interdisciplinary area of sport sciences and public health. It links several scientific disciplines in an integrated fashion, to address critical issues related to sport science and public health. The journal presents diverse original articles, including systematic and narrative reviews, cohort and case control studies, innovative randomized trials, and formative research using qualitative and quantitative methods with the aim to provide information for researchers to plan intervention programs. It addresses diverse public health, physical activity and exercise science topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Sport Sciences*) / CiteScore - Q2 (*Physical Therapy, Sports Therapy and Rehabilitation*)
