Emotions in Sports and Exercise

Message from the Guest Editor

Emotions and related affective constructs are a central part of both sport and exercise. The relationship between emotions and sport and exercise can be regarded as reciprocal. Physical activity is shown to change emotional states and can even work in conjunction with traditional forms of medicine as a form of treatment or the prevention of clinical disorders. Research also highlights the role of emotions in physical education as a catalyst in the learning process. Most people would probably intuitively agree with the paramount importance of emotions in sport and exercise. However, compared to predominant cognitive approaches, research on the role of emotions in these fields is rather scarce and many aspects regarding their relationship are still unknown. For this reason, the goal of this Special Issue is to address this shortcoming and pool research endeavors to strengthen our knowledge about the role of emotions in the field of sport and exercise, as well as physical education. About the Journal

Message from the Editor-in-Chief

Sports (ISSN 2075-4663) is a peer-reviewed scientific journal that publishes original articles, critical reviews, research notes and short communications in the interdisciplinary area of sport sciences and public health. It links several scientific disciplines in an integrated fashion, to address critical issues related to sport science and public health. The journal presents diverse original articles, including systematic and narrative reviews, cohort and case control studies, innovative randomized trials, and formative research using qualitative and quantitative methods with the aim to provide information for researchers to plan intervention programs. It addresses diverse public health, physical activity and exercise science topics.

Editor-in-Chief

Prof. Dr. Eling Douwe De Bruin

1. Institute of Human Movement Sciences and Sport, IBWS ETH, HCP H 25.1, Leopold-Ruzicka-Weg 4, CH-8093 Zürich, Switzerland
2. Karolinska Institutet, Stockholm, Sweden

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical Therapy, Sports Therapy and Rehabilitation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
