submissions:

**closed (30 November 2023)**

### Message from the Guest Editors

This Special Issue aims to address the challenges and explore synergies of two related concepts: quality management and sustainability. This Special Issue asks for relevant research supported by the soundest research methods and reviews papers on topics that include but are not limited to the following:

- Sustainable standardized management systems
- Management systems and the SDGs
- Sustainable standardized integrated management systems
- Standardized management systems and sustainability
- Sustainability and management system performance
- Sustainable management systems and forthcoming challenges
- Sustainable risk-based thinking
- Sustainable management systems and supply chain management (SCM)
- Sustainable industry 4.0
- Sustainable industry 5.0
- Sustainability and integrated management systems (IMSS) 4.0
- Quality management 4.0
- The profile of the sustainability leader team in the 21st century
- Standardized management systems and social responsibility
- New tools and methods to improve sustainable IMSs' effectiveness and efficiency
