Reconstructive and Aesthetic  
Surgery, CHRU de Brest, Brest  
University, Boulevard Tanguy-  
Prigent, 29200 Brest, France

Deadline for manuscript  
submissions:

**closed (15 October 2022)**

### Message from the Guest Editors

We are pleased to announce the launch of a Special Issue of *Surgical Techniques Development* (STD, ISSN 2038-9582), a peer-reviewed open access journal, dedicated to innovative techniques and updates on the state of the art in the multidisciplinary fields of plastic reconstructive and aesthetic surgery.

We would like to explore the different aspects of plastic surgery, taking into account the clinical outcome, i.e., the functional and/or aesthetic features of our surgical procedure. Moreover, we would like to focus on the state of the art in current practice concerning innovative surgeries and innovative materials to support them, with a special eye on technique innovations in two relevant fields of plastic surgery, face and breast, either for oncoplasty or aesthetics.

We would appreciate it if you join us in this upcoming issue and be one of many renowned authors to submit a paper.

We look forward to your manuscript proposal as an email attachment to the Editorial Office at [std@mdpi.com](mailto:std@mdpi.com). We would be happy to confirm the quality of your contribution on “At the Frontiers of Plastic and Aesthetic Surgery”.

Tumori, 20133 Milano, Italy

## Message from the Editor-in-Chief

The amazing world of the surgical sciences consistently grows thanks to innovations, technologic and robotic changes, and lastly to the progress in artificial intelligence. Nevertheless the human factor still remains fundamental in all the fields of Surgery. Individual skills in surgical techniques and multidisciplinary approaches are strengthening the patient care options and efficiency. Our journal wishes to become the spotlight for different surgical specialties such as general surgery and endoscopy, oncological surgery, plastic surgery, head and neck, gynecology, thoracic surgery, orthopedics, neurosurgery and other fields.

Progress in recent years has led surgical technologies and procedures to extend to several specialties, thus the need for a journal to collect all related topics. Therefore, *Surgical Techniques Development* will encourage multidisciplinary contributions.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [ESCI \(Web of Science\)](#), [Embase](#), and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.5 days after submission; acceptance to publication is undertaken in 6.2 days (median values for papers published in this journal in the second half of 2025).
