Department of Emergency Surgery, University Hospital of Careggi, Largo Brambilla n° 3, 50134 Florence, Italy

Deadline for manuscript submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

Adrenal surgery is a complex and nuanced field that requires a deep understanding of the adrenal gland's complex physiology and its intricate relationship with the body's endocrine system, which often presents clinicians with a myriad of challenges. The intricate nature of adrenal disorders, coupled with the potential for severe complications, requires a thorough understanding of both the underlying pathophysiology and the surgical techniques involved. This Special Issue aims to provide a comprehensive and multidisciplinary overview of the current state of knowledge and practices in adrenal surgery.

We look forward to receiving your submissions and facilitating a robust and informative exchange of ideas and experiences.

Dr. Ferdinando Agresta
