Oral and Maxillofacial Surgery: Balance Between Innovative and Proven Procedures, Drugs and Materials

Guest Editors:

Dr. Maciej Chęciński

Department of Oral Surgery,
Preventive Medicine Center,
Komorowskiego 12, 30-106
Kraków, Poland

Dr. Karolina Walczyńska-Dragon

Department of
Temporomandibular Disorders,
Medical University of Silesia in
Katowice, 41-800 Zabrze, Poland

Dr. Igor Tsisis

Department of Endodontology,
Maurice and Gabriela
Goldschleger School of Dental
Medicine, Tel Aviv University, Tel
Aviv 61000, Israel

Deadline for manuscript
submissions:

closed (20 September 2024)

Message from the Guest Editors

Dear Colleagues,

The clash between experience and modernity is a particularly delicate issue in medicine. Effective and safe treatments are always a balance between the old and the new. I invite you to cocreate, with the aim of presenting the best proven practices, innovative clinical management and prospects for the development of oral and maxillofacial surgery.

Potential topics include, but are not limited to: best proven vs. the latest diagnostic methods; advances in craniofacial traumatology; predictable orthognathics in the context of digitization; innovations in the treatment of temporomandibular joints; apparent stagnation in inflammation therapy; constant and developing aspects of oncology; novelties vs. traditional methods in reconstructive surgery; dental implantology: the evidence-based race of innovation; postsurgical maxillofacial prosthetics; importance and new possibilities of postoperative observation; failures necessary to share to avoid their occurrence.

Message from the Editor-in-Chief

Surgery, as in the ‘stitching of wounds with bone needles’, is the oldest form of medicine after herbs, dating from 30,000 BC. While basic principles remain, technology has progressed enormously, especially in recent years. *Surgeries* provides a platform for all surgery-related developments, both clinical and scientific, while its open access format ensures global availability. A wide variety of subjects will be covered by our enthusiastic, international, and interdisciplinary Editorial Board and team. Besides ensuring rapid, high-quality review, editors will actively organize Special Issues on topics of high interest. Together with authors and reviewers, we aim to develop *Surgeries* into an indispensable, easily accessible source for surgery professionals and beyond.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [ESCI \(Web of Science\)](#), [Scopus](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.4 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the second half of 2025).
