Vivaldi, 43, 81100 Caserta, Italy

Deadline for manuscript  
submissions:

**closed (31 July 2023)**

### Message from the Guest Editors

Dear Colleagues,

There are several actions that can be implemented in order to effectively achieve circular economy. These can affect different life cycle stages, by introducing new design criteria, good practices in consumer behaviours, and innovative end-of-life options. This Special Issue focuses on possible ways to improve the sustainability of municipal solid waste management (MSW) by investigating currently available options and those to be implemented in the near future.

Research areas may include (but are not limited to) the following:

- Emerging technologies for waste management and resource optimization.
- Optimization of traditional treatments for municipal solid waste management.
- Mechanical, physical and chemical recycling routes for resource recovery from municipal solid waste.
- Opportunities and challenges of applying gasification to municipal solid waste.
- Specific fractions of municipal solid waste of interest in a circular economy perspective.
- Life cycle assessment of alternative options/schemes for municipal solid waste management.

We look forward to receiving your contributions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
